WORDS TO KNOW

- Term:** Length of time in the chosen crediting strategy.
- Buffer:** The level of downside protection where index losses are protected. Index losses that exceed the buffer will result in a loss of Account Value.
- Cap Rate:** The maximum amount of potential gain, if index return is positive, that can be credited. The cap rate can be “uncapped” in which case the maximum Index Credit is equal to the Index Return.
- Participation Rate:** The percentage applied to any positive index return used in calculating the index credit.
- Tier Level:** The declared Index Return that is used to determine which tier applies in the calculation of Index Credit.
- Index Return:** Percentage change in the index value.

Cap Rates, Participation Rates, and Tier Levels set by Prudential are subject to change at any time. **To ensure you have the most up-to-date rate information**, visit [www.prudential.com/ flexguardny-rates](https://www.prudential.com/flexguardny-rates). Prudential FlexGuard–NY’s index strategies do not represent a direct investment in an index or ETF. To receive the rates shown, your application needs to be signed on or after the date shown above and before new rates are established through a new rate sheet. From the date you sign your Annuity Application, we must also receive that paperwork in good order within 15 calendar days of the application signed date. Your Index Effective Date must then be within 45 calendar days of your application signed date. If these conditions are not met, we will issue your contract using the current Index Strategy Rates in effect on your Index Effective Date.

Renewal Cap Rates and Participation Rates may be higher or lower than the initial rates but will never be less than the Guaranteed Minimum Rates. Tier Levels may be higher or lower than the initial Tier Level but will never be higher than the Guaranteed Maximum Tier Level. Subsequent rates and Tier Levels may differ from the rates and Tier Levels used for new contracts or for other contracts issued at different times. Renewal rates and Tier Levels are impacted by changes in various economic factors. Please speak with your financial professional for more information.

Index-linked variable annuity products are complex insurance and investment vehicles. There is risk of loss of principal if negative index returns exceed the selected protection level. Gains or losses are assessed at the end of each term. Early withdrawals may result in a loss in addition to applicable surrender charges.

Investors should carefully consider the features of the contract, index strategies, and the underlying portfolios’ investment objectives, policies, management, risks, charges and expenses. The initial summary prospectus and the index strategies prospectus for the contract, and the summary prospectus or prospectus for the underlying portfolios (collectively, the “prospectuses”) contain this and other important information and can be obtained from your financial professional. Please read them carefully before investing. It is possible to lose money by investing in securities.

A variable annuity is a long-term investment designed for retirement purposes. Investment returns and the principal value of an investment will fluctuate so that an investor’s units, when redeemed, may be worth more or less than the original investment. Withdrawals or surrenders may be subject to contingent deferred sales charges. Withdrawals and distributions of taxable amounts are subject to ordinary income tax and, if made prior to age 59½, may be subject to a 10% additional tax. Withdrawals reduce the account value and the living and death benefits.

All guarantees are backed by the claims-paying ability of the issuing company, do not apply to the underlying variable investment options and are not the obligations of the third-party broker-dealer from which this annuity is purchased or any of its affiliates.
